

Cactus, Succulent and Tropical Plant Seed List

Quantities of around 10 to 20 seeds of each species requested are available
free to members of:

The Ottawa Area Cactus and Succulent Group *
The Toronto Cactus & Succulent Club**
Društvo prijateljev kaktusov Slovenije***
[The Friends of Cacti Society of Slovenia***]

While generally the seed offered will produce plants true to type and, as far as can be verified, have been correctly named, *The Ottawa Area Cactus and Succulent Group* cannot make any guarantees regarding the name and purity of the seed provided.

Hybrids are rare in habitat, so where seeds are listed as *Collected in habitat; hand pollinated in controlled conditions, or self pollinated in controlled conditions*, it is highly likely that this seed will produce plants true to type. Where there is any other statement on pollination, members should bear in mind that these seeds may well come true but may produce hybrids. Any additional seed donations from members of any of our three cooperating organizations would be welcome. Contact Ken Hancock at kenhancock@lapp-hancock.ca

Notes: Seeds in shown in RED are no longer available. These rows will be deleted in the next issue of this list.
The seeds in shown in BLUE are new in this issue. These rows will be Black in the next issue of this list
Seeds show in GREEN are held in Slovenia; Canadian members please allow at least three for weeks for delivery

- Contact Ken Hancock: (613) 225-6383 or kenhancock@lapp-hancock.ca with your request and the seeds will be brought to the next meeting.
- ** Contact Ken Hancock: (613) 225-6385 or kenhancock@lapp-hancock.ca with your request and the seeds will be mailed to you
- *** Contact Yannick Gregom : yannick_gregom@yahoo.com who will coordinate all requests for seeds with Ken Hancock

+ *Echinocereus roetteri* is already an F1 hybrid so this cross with *E. coccineus* means the seeds are still *E. coccineus* x *E. dasyacanthus* but are now F2. Thus an alternative listing would be *Echinocereus* X-*roetteri* F2

* * *

Aylostera fierbrigii
Aylostera fusca
Echinocereus fitchii
Echinocereus viridiflorus
Echinopsis ancistrophora
